DETAILED ACTION

Allowable Subject Matter

1. The indicated allowability of claims 2,5,7,12-17 is withdrawn in view of the newly discovered reference(s) to Gerber 6,286,725. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 1-5,7,10-17,25 are rejected under 35 U.S.C. 102(b) as being anticipated by Gerber 6,286,725.

Gerber discloses a backflow preventing plug as seen in Figures 1C, which comprises a thin film resilient membrane (8) defining a flow path having an intake port and an outlet port as seen in Figure 1C, and a ball-shaped plug member (2) retained between the intake port and the outlet port in the flow path in the resilient membrane and formed with a spherical sealing surface for restricting flow of fluid by coming into resilient contact with a middle portion of the resilient membrane as seen in Figure 1C, clearance forming means comprising a plurality of recesses (18) formed in a recess shape, wherein the resilient membrane is expanded and deformed in a direction away

Art Unit: 3754

from the plug member by a fluid pressure applied from the intake port as seen in Figure 1C, a container (see Figure 9B), the plug member has a spherical or an ellipsoidal shape as seen in Figures 1A-C, guiding means (16), the container body includes a cylindrical member for accommodating contents, and an axially slidable piston fitted into the cylindrical member as seen in Figure 9A.

Allowable Subject Matter

4. Claims 18-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments filed 5/4/2010 have been fully considered but are moot in view of the new ground(s) of rejection.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Frederick C. Nicolas whose telephone number is (571)-272-4931. The examiner can normally be reached on Monday - Friday from 9:00 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin P. Shaver, can be reached on 571-272-4720. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
